## DESCRIPTION

Exam Buddy is a web-based academic assistant platform for students, teachers, and institutions. It allows students to upload study material and generate practice papers, extract hot/important topics using AI, cluster previous-year questions, and access class/university resources through role-based dashboards (Student, Teacher, Admin). The backend exposes a REST API that handles document processing (OCR / PDF extraction), AI-based content extraction, database storage

and PDF generation. The frontend is a single-page application providing the student, teacher and admin interfaces.

## TECHNOLOGY STACK

Backend Language : Python

Backend Framework: FastAPI

Database : PostgreSQL (SQLAlchemy ORM)

Frontend Language: TypeScript / JavaScript

Frontend Framework: React (Vite)

Markup / Styling : HTML, CSS (Tailwind CSS)

Other : OCR (pytesseract, PyMuPDF), ReportLab (PDF generation)

## ORIGINALITY DECLARATION

I hereby declare that the source code and object code submitted herewith constitute my original work, except for standard third-party open-source libraries and frameworks (as listed under Technology Stack and in requirements.txt / package.json) which are used under their respective open-source licenses and are not claimed as part of this work.
